

# DOUGH CHECKWEIGHER FOR DOUBLE PIECES

## Techno D-IA

### Advantages

- **Increase of productivity:** eliminate the doubleweight pieces came from intermediate proofer
- **Increase of efficiency:** simplification of the staff scheme and high level of repetitiveness of the weighing operation;
- **Usability:** storing of at least 6 pre-defined receipts;
- **Versatility:** extended range of weight, between 40 and 2500 g;
- **Increase of the product quality:** uniformity of the finished product's weight, within the parameters imposed by technology and legal norms;
- **Follow-up of production:** it generates reports containing information regarding the number of pieces of products grouped on assortments, number of pieces rejected on assortments, total quantity of processed dough and total quantity of rejected dough;

MODEL	TECHNO D-IA
Dimensions	430 (l)×800 (L)×1810 (h)
Supply voltage	230V 50Hz
Absorbed power	500 W
Air pressure	min 5 bar
Maximum speed of the conveyor belt	45 m/min
Conveyor belts	cu agrementare FDR
Maximum cadence	3600 buc/h
Weighing range	40 – 2500 g
Minimum display division	1 g
Minimum value of verification	5 g
Weighing error	+ / - 5 g

### Functional characteristics

- Automatic rejecting of over-weighed and under-weighed pieces;
- Work with predefined receipts of products;
- Production reports grouped on assortments and shifts;
- Permanent display of the latest value weighed;
- Extremely easy calibration;
- Easy maintenance for belts
