

## DOUGH MOULDER

# Technomod MD2

### Benefits:

- Moulding repetition: the same consistency of the products are obtained at more than 95% from the lots;
- Increase of efficiency: simplification of the staff scheme and high level of repetition for moulding operation;
- Ease of exploitation: only 2 engines and easy exploitation;
- Versatility: extended range of weight between 100 and 1800 g;
- Increase of product quality: uniformity of shapes of the finished product within the parameters imposed by the technology;
- Security of exploitation: all the mobile elements have electric safety devices;
- Adjustable moulding capacity: easy to control both moulder speed and final moulding plate too;

MODEL	TECHNOMOD MD2
Dimensions	910(L)X2200(l)x1450(H)
Supply voltage	400V 50Hz
Absorbed power	1500 W
Maximum speed of the conveyor belt	60m / min
Conveyor belt	with FDR agreement
Maximum capacity <small>(depending on the weight and quality of the dough)</small>	3000 pieces/h
Moulding weight interval	100-1800g
Rolling drums	4

### Functional characteristics:

- Precise moulding;
- Easy and fine adjustment of plates and flaps;
- Drums and plates made of non-adhesive material;
- Conveyor belt made of non-adhesive material;
- Active cleaning for lamination drums;
- Simplified and durable maintenance;
- Motorized II moulding plate;
